Compromised users	15 %	70	20	20	30
Compromised endpoints	8%	60	5	45	10

Json Data format : Assigninment-data.json (for table use **defaultReport**.**aggregated** object and for Chart use **defaultReport.items**)

Note: Data shown are for representation purpose only.

Instructions:

- Please complete this assignment using React. Feel free to use any other libraries/frameworks as you see fit.
- The code should be production ready and hosted somewhere in a publicly accessible location like on AWS, Heroku, etc.[for Ref: https://create-react-app.dev/docs/deployment/]
- Please include a README file.

Submission:

Please submit the source code of your solution as a GitHub repo.

Assessment Criteria:

- Code correctness.
- Overall code quality.
- UI/UX
- Clear Documentation of the code

Optional Enhancements:

- Add Search to Table
- Add Sort to Table
- [Advanced] Connect table and chart – on disabling a series on chart , that row should be removed from table as well
